Restriction to one of the following inventions is required under 35 U.S.C. §121:

- I. Claims 4-11 and 15, drawn to a specific peptide and method of activating it, classified in, e.g., 530/326.
- II. Claims 12-14, drawn to activating any peptide that inhibits growth or proliferation of tumors, classified in, e.g., 530/350.

The claimed inventions are distinct. Group II is drawn to a method of activating any peptide using any "detergent". Given that the "detergent" encompasses both ionic and non-ionic detergents, and would even encompass proteins, the Group II method does not "define a contribution" over the prior art. Accordingly, the claimed inventions are distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their divergent subject matter, restriction for examination purposes as indicated is proper.
